Work experience

Farm worker 2025/06 - Present

HP Group Services Trade Company Limited

- Receiving seasonal production plans; preparing cultivation areas by clearing weeds, tilling the soil, forming planting beds, and allocating sowing areas for each type of vegetable, bean, or flower.
- Selecting and preparing seeds; soaking, germinating, sowing, raising seedlings, and transplanting seedlings in accordance with the company's production schedule.
- Irrigating crops using sprinkler irrigation systems; checking soil moisture and drainage conditions; and providing crop protection during periods of extreme heat or heavy rain.
- Applying basal and top-dressing fertilizers and supplementing organic or other fertilizers as instructed; weeding, loosening the soil, improving the soil quality, and thinning overcrowded plants.
- Inspecting cultivation areas daily to identify poor growth, pests, diseases, or weather-related damage; reporting to the person in charge and assisting in implementing corrective measures as instructed.
- Harvesting agricultural products according to the harvest schedule; selecting produce at the appropriate maturity stage while minimizing bruising, breakage, or other quality damage.
- Performing post-harvest handling by removing old leaves, roots, soil, and non-conforming produce; then sorting, bundling, or packaging products in accordance with the company's specifications.
- Cleaning cultivation and processing areas, seedling trays, containers, and work tools; organizing materials, monitoring harvested quantities, and reporting work results to the direct supervisor.

Stone Mason 2023/07 - 2025/05
